Gender Safeguarding & Social Inclusion (GESI) Policy

Institutional commitment to gender equality, PSEAH standards, and inclusive AI in education

DOCUMENT ID: MS-GESI-2026-V1
VERSION & DATE: v1.2 (Adopted October 2026)
GOVERNANCE STATUS: Active / Approved for Grants & Play Store
RESPONSIBLE OFFICER: Head of Trust & Safety (KNEITHEN TECH)
APPLICABLE JURISDICTION: Global / Uganda & International EdTech
REVIEW CYCLE: Annual (Next: Oct 2027)

SECTION 01

1. Vision, Statement & Policy Mandate

Guiding Principle: Access to world-class academic comprehension is a universal human right. MonetStudy actively dismantles gendered, geographic, and socio-economic hurdles across the educational lifecycle.

MonetStudy, developed by KNEITHEN TECH, operates on the foundational principle that high-depth academic mastery should be universally accessible. In many developing regions, young women and marginalized communities face disproportionate obstacles to educational equity, digital access, and advanced STEM careers.

This Gender Safeguarding, Equality & Social Inclusion (GESI) Policy defines our binding standards to eliminate gender-based discrimination, guarantee physical and digital safety, eliminate algorithmic bias, and uphold international standards for the Prevention of Sexual Exploitation, Abuse, and Harassment (PSEAH).

SECTION 02

2. Prevention of Sexual Exploitation, Abuse & Harassment (PSEAH)

MonetStudy maintains an absolute zero-tolerance policy regarding sexual exploitation, abuse, and harassment in all its forms across our technical ecosystem and workforce:

- **Prohibition of Sexual Harassment:** Strict prohibition of unwanted sexual comments, coercive advances, derogatory gendered jokes, or hostile micro-aggressions in public course notes or platform forums.
- **Rejection of Educational Gatekeeping:** Absolute ban on any attempt by tutors, contributors, or staff to solicit personal favors or compromise learner autonomy in exchange for academic content or grading assistance.
- **Safe Digital Learning Commons:** All shared courses and collaborative modules are subject to automated NLP linguistic moderation to preempt and neutralize gendered harassment.

SECTION 03

3. Algorithmic Fairness & Gender-Inclusive AI Curricula

Recognizing that historical academic texts frequently underrepresent women and minority contributors, our pedagogical engineering actively counteracts systemic bias:

- **Diverse Curriculum Prompting:** System prompts instruct Gemini AI models to actively reference seminal discoveries by female scientists, African mathematicians, and non-Western researchers across complex topics.

• **Balanced Audio Narration ("THE MONETS"):** Our voice studio offers an equitable balance of male and female voices (Clara, Arthur, Julian, Elena, Victor) to ensure students learn through authoritative, empowering voice role models.

• **Elimination of Gendered Stereotyping:** Algorithmic guardrails prevent occupational stereotyping (e.g., associating leadership or engineering exclusively with masculine pronouns).

SECTION 04

4. Digital Inclusion & Accessibility in Low-Resource Environments

Gender inequality intersects deeply with economic and infrastructural barriers. MonetStudy deploys targeted technological adaptations to ensure female students in low-income or rural settings are not excluded:

• **Low-Data Architecture:** Text lessons and SVG vector diagrams are optimized for minimal byte consumption, allowing full course generation on budget smartphones and 3G connections.

• **Local Audio Caching:** Browser and server cache layers store audio narrations so students can replay lessons repeatedly without incurring repeated mobile data costs.

• **Multi-Modal Accessibility:** Audio lessons, visual flowcharts, and text summaries accommodate diverse learning styles, visual impairments, and auditory learners equally.

SECTION 05

5. Confidential Grievance Redress & Anti-Retaliation

MonetStudy provides a confidential, independent grievance reporting channel for any learner or team member who encounters gender-based discrimination or harassment:

• GESI Committee Lead: Diversity & Inclusion Oversight Officer
• Confidential Intake: monetsbox@gmail.com (Subject: CONFIDENTIAL GESI COMPLAINT)
• Anti-Retaliation Guarantee: Full whistleblower protection and zero tolerance for adverse consequences against any individual reporting in good faith.

All reported grievances are triaged within 48 hours by an independent panel to ensure impartial investigation and corrective action.

SECTION 06

6. Monitoring, Accountability & Grant Impact Reporting

KNEITHEN TECH monitors anonymized, gender-disaggregated platform analytics to measure course completion, engagement, and learning outcomes across demographics.

These insights are incorporated into our Annual GESI Progress Report, submitted transparently to international development partners, educational donors, and grant review committees.
